

Expenditure Adjustments:

Appropriate:

1. The City had a developer present plans to City Council and Planning & Zoning that was denied. The developer requested to get any or all of its development fees back. Usually, these fees are not-refundable, however, the amount requested of the developer contained a miscalculation which caused the developer to overpay the development fees. These fees were paid into the Village Development, Capital Projects fund and that is where the refund needs to come from. We are requesting to appropriate the funds necessary to refund the overpayment only.

Village Development, Operating Expenditures	\$	254.00
