## **FUEL GAS WORKSHEET**

If you are adding gas appliances to an existing system, please provide the following information:

Existing appliance load \_\_\_\_\_ BTU

New appliance load + \_\_\_\_\_ BTU

Total appliance load = \_\_\_\_\_ BTU

Meter size \_\_\_\_\_

Maximum meter load/hour \_\_\_\_\_ BTU

Approved delivery pressure \_\_\_\_\_ PSI

Provide a schematic diagram showing the new piping. Include the type of piping (copper, steel, plastic, etc), size of piping (diameter), and length of piping (feet).

*\* If your total appliance load exceeds the maximum meter load/hour, you will need to consult with your natural gas supplier concerning your project.*
